About Beat Childhood Cancer

Our Mission

We will Beat Childhood Cancer by funding novel research and innovative clinical trials. By utilizing precision medicine for children with solid tumor cancers, we will create options for kids **TODAY** to increase survival and decrease toxicity.

Our Vision

We will change the story for the next family by finding viable treatments and, ultimately, cures for childhood cancer.

We will help every child, everywhere **survive and thrive**.

Our Model

We drive personalized precision medicine and clinical trials for childhood cancer, accelerating research and expanding access to better treatments.

Precision medicine is the future of cancer care. By using targeted therapies with minimal side effects, we help prevent relapse without long-term harm.

Every cancer and patient is unique, but insights from one case help improve treatment for all.

Our allegiance of clinicians, scientists, parents, and supporters has built an international research network, uniting over 50 children's hospitals and institutions across North America to advance better therapies for kids.

We'll do whatever it takes to bring hope to every child, everywhere.

55+

The Beat Childhood Cancer Research Consortium is made up of over 55 children's hospitals and research institutions expanding globally.

27

27 clinical trials and counting have been opened directly affecting kids TODAY with more planned for this year.

2023

More than a decade of work resulted in the approval of DFMO in 2023 now known as IWILFIN for the prevention of relapse in kids with neuroblastoma.

40+

Children from more than 40 different countries are beating childhood cancer thanks to the novel therapies being funded.
