The form is available online at **beatcc.org/fish**

**BEAT
CHILDHOOD
CANCER**

Our Mission We will beat childhood cancer by funding novel research and innovative clinical trials utilizing precision medicine to target solid tumors in children.

Our Vision Change the story for the next family by finding viable treatments and, ultimately, cures for childhood cancers.

Our Model We drive patient-affecting childhood cancer clinical trials, expanding how research is done. Precision medicine is the future of cancer treatment. We are helping kids now with targeted therapies and oral drugs with low side effects aimed at preventing or treating relapse without punitive, long-term side effects. Our community of clinicians, scientists, parents, and supporters has built an international infrastructure and team of research and clinical collaborators to ensure kids have access to these therapies. By supporting more than 50 children's hospitals and research institutions across North America, we will . . . beat childhood cancer.
