CHILDHOOD  
CANCER

# HOPE IS ON THE MOVE.

**2025**  
Report  
to Donors

## Heroes Never Stand Alone.

They rise, unite, and take on the impossible . . . together.

Because of your commitment in 2025, that's exactly what happened.

- More clinical trials opened where families could find them.
- More hospitals joined forces instead of fighting alone.
- More children are alive today who were once told there were no options left.

This is hope, but not the fragile kind. It's hope backed by real science, real collaboration, and real access.

Together, we're building what the system couldn't: personalized treatments, closer-to-home trials, and new paths forward when others said there were none.

Every day, we're proving that heroes don't just dream of change, they make it happen.

Beat Childhood Cancer's strength comes from the people who choose to join the fight: families, doctors, researchers, and donors who refuse to wait for someone else to save the day.

You didn't just support this mission in 2025.

You became part of the alliance. And because of you, more children have options today than they did a year ago.

That's not symbolic.

**That's heroic.**

Thank you for joining the fight.

Thank you for refusing to wait.

Thank you for helping build what children need . . . right now.

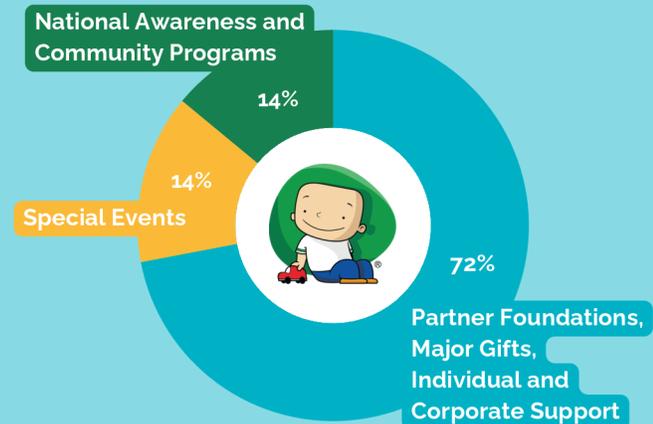

**SARAH BARTOSZ**  
EXECUTIVE DIRECTOR

## 2025 Financials

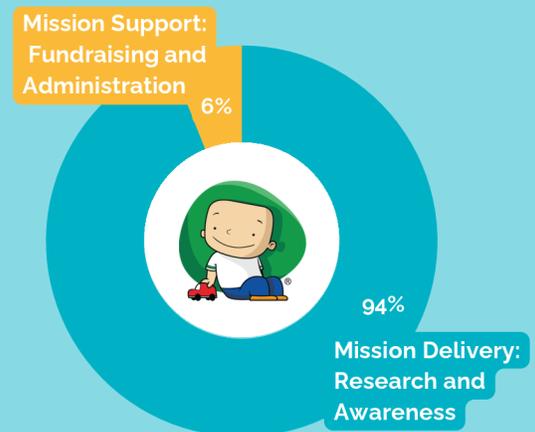

### Where the Money Comes From

Representing \$3.8M, total funds received by the organization during the 2025 Fiscal Year.

### Where the Money Goes

Representing overall spending during the 2025 Fiscal Year.

When you give to Beat Childhood Cancer, you are giving children more than hope. You are giving them options. You are expanding access to clinical trials, advancing less toxic and more tailored treatments, and breaking down the silos that slow progress.

We will not stop until every child, everywhere has better options.

# We are in this fight together.

## Clinical Trial Updates

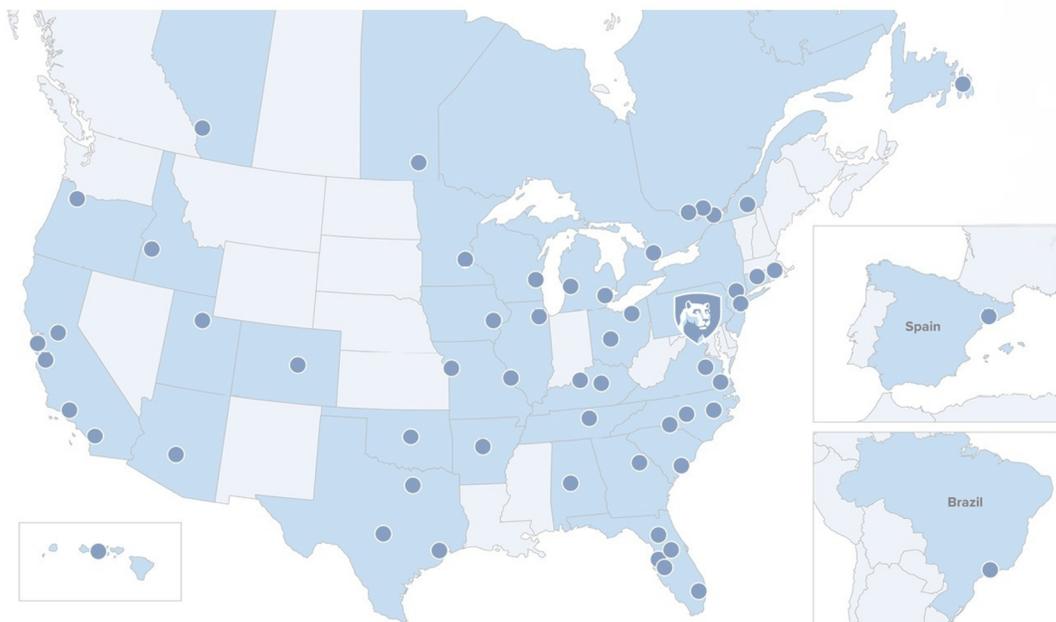

The BeatCC Foundation provided ongoing support for 10 active clinical trials as well funding for the activation of 2 new clinical trials in 2025.

- BCC020 is a Dose Escalation Study Using DFMO and AMXT1501 for relapsed/refractory sarcomas, neuroblastoma, and central nervous system tumors ATRT, ETMR, and DIPG.
- BCC023, a study using DFMO in 4 patient cohorts for Ewings sarcoma and osteosarcoma.

## Global Outreach & Expansion

We're thrilled to announce that the Beat Childhood Cancer Research Consortium finalized agreements with two international sites. Led by Dr. Jaume Mora, Hospital Sant Joan de Déu (SJD) Children's Hospital in Barcelona, Spain joined the Consortium in late 2025. In addition, under the leadership of Dr. Natalia Ambar, GRAACC Children's Hospital in São Paulo, Brazil became the newest member of the Consortium in early 2026. Together, these partnerships represent a monumental stride in our commitment to advancing pediatric oncology research and bringing hope to families around the globe.

# Fighting for every child, everywhere.

## Kids with cancer can't wait. Neither should we.

The current pediatric healthcare system is slow, isolated, and siloed. But it doesn't have to be this way.

So we made a choice. We stopped waiting. We started building around it.

## Our Commitment.

We know our allegiance will cure childhood cancers. We just don't know how quickly.

The most powerful thing we can do is make it possible for parents, researchers, and doctors to work together. We are committed to giving more children access to the right options, at the right time, in the right place . . . and as fast as humanly possible.
